TRAINING TYPES

For 2019, we have prepared bombastic trainings in four areas of ninja skills.

Presentation

Emailing

Negotiation

Calls

Presentation

Make a special impression. Be remembered.
Say exactly what you want. Look like a pro.
Sound like an Attenborough. Practice real skills.
With or without Powerpoint.

Practical and satisfying trainings for those with or
without confidence.

Emailing

Think of how much time it takes. How much stress you get. How many replies are needed. And how much depends!

Emailing's an art. Or it should be. Want to master it and start winning these business battles of yours?

Become a ninja!

Negotiation

Note: this is not a training for army generals.
This is a proper workshop for real people with real
ambitions.

Content theory, strategic planning, the art of asking
questions, and meeting culture. As simple as that.
And difficult as hell!

Calls

Spend all day with Webex, Link, or on the phone?
Talking to foreigners in multilateral sessions?
You have already learnt how troublesome it gets.

This workshop simulates real business cases to
teach you effective call manners, and to instruct you
on moderating and participating strategies.

Plus there's fun!
